ELI AND EDYTHE BROAD CENTER OF REGENERATIVE MEDICINE AND STEM CELL RESEARCH AT UCLA

Cures once thought to be miracles are now becoming possible at the Broad Stem Cell Research Center at UCLA.

Bringing together world-class physicians, engineers, scientists and others, the center develops stem cell discoveries in the lab and translates them into therapies for the patient.

Join the center's director Owen Witte for an introduction to the future of stem cell science. He'll be joined by faculty researchers Gay Crooks, Sanaz Memarzadeh and Hanna Mikkola. Each woman is at a different point in her stellar career path; all draw inspiration from the innovative, integrated environment at the Broad Stem Cell Research Center at UCLA.

Women & Philanthropy invites you to

DISCOVER | LEARN | CURE

Wednesday, April 21, 2010

Neuroscience Research
Building, UCLA
635 Charles E. Young Drive

Presentation-4:00 p.m.
Reception to follow

Featuring:

Owen Witte

Director, Broad Stem Cell
Research Center at UCLA
*Expanding the culture of
scientific exploration*

Gay Crooks

Professor of Pathology and
Laboratory Medicine and of
Pediatrics
*New applications for bone
marrow stem cells*

Sanaz Memarzadeh

Assistant Professor of Obstetrics
and Gynecology
*Uterine stem cells and the
treatment of women's cancer*

Hanna Mikkola

Assistant Professor of Molecular,
Cell and Developmental Biology
*Advancements in stem cell
therapy for leukemia and other
blood cell disorders*

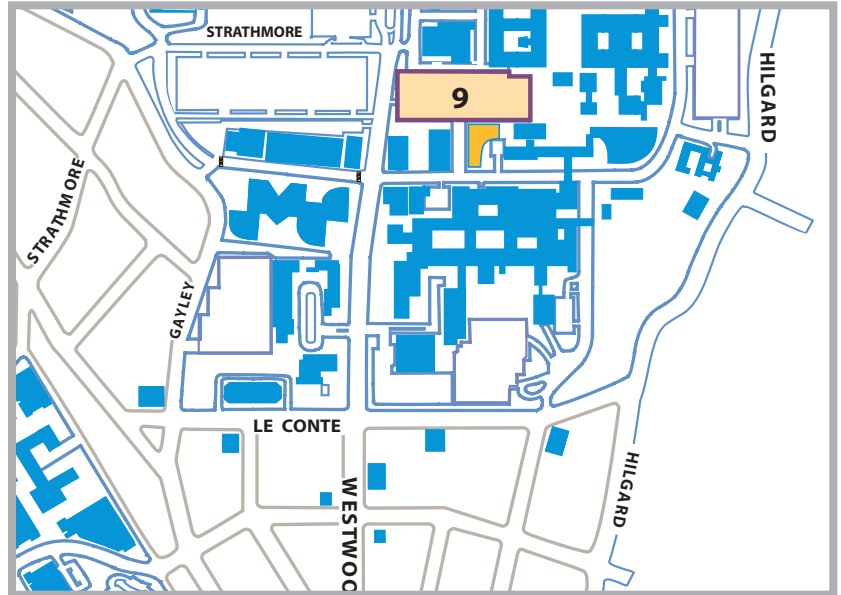

Please respond by April 12, 2010.

Response card enclosed.
Inquiries: 310-794-2389
E-mail: wmnphil@support.ucla.edu
Map on reverse.

Women & Philanthropy
at UCLA: Committed to
the idea that philanthropy,
when thoughtfully
directed, can make
profound changes in the
lives of others.

Directions: Enter the campus
on Westwood Blvd. • Turn
right onto Charles E. Young
Drive South. • At the first
stop sign, turn left to enter
parking structure 9. • Parking
may be purchased from
the attendant for \$10. • Exit
the structure and look for
signage which will lead you
to the Neuroscience Research
Building.
