Women & Philanthropy cordially invites you to attend

THE NEW EVOLUTION

HOW GENOMIC SCIENCE AND SOCIETY ARE SHAPING OUR HUMANITY

Edward R.B. McCabe, M.D., Ph.D., is the Mattel Executive Chair of the UCLA Department of Pediatrics, Physician-in-Chief of Mattel Children's Hospital at UCLA, and Director of the UCLA Center for Society, the Individual and Genetics.

What will be the consequences when a person's genome can be sequenced for \$1,000? Will the genetic marketplace privilege some individuals over others? How do we maintain our humanity when we put a price tag on our genes?

Join us for a fascinating look at the principles of genomic medicine, the changes it will bring to health care, and how genetics and society are shaping each other.

With special guest

Edward R.B. McCabe, M.D., Ph.D.

Co-director

UCLA Center for Society and Genetics

Wednesday, March 14, 2007

Neuroscience Research Building

Women & Philanthropy

at UCLA recognizes the

need for women to be widely

represented throughout the UCLA

community as major donors,

leaders and decision makers. We

are committed to the idea that

philanthropy, when thoughtfully

directed, can make profound

changes in the lives of others.
